Democratized Prime

November 2025

Introducing Democratized Prime

Delivering defi users a stable, high-quality, high-capacity, liquid and above market risk-adjusted yield through Demo Prime.

**Each loan is natively
originated on-chain**
including all underwriting data

**Loans are
traded on-chain**
via Figure Connect

**Loans are
pledged on-chain**
via DART Figure's lien-registry

Largest non-bank HELOC originator

\$17bn; ~\$1bn/mo

Real-World Credit Trading On-Chain

On-chain HELOCs that trade like spot: depth, volume, and risk-anchored marks.

Total Supply

The Demo Prime Yield Engine

Standardized HELOC collateral with overcollateralization, hourly matching, live marks, and hard triggers.

OVER-COLLATERALIZATION

90% LTV

Newly originated HELOCs (\$1.03) enter DP at \$1.00, with max of \$0.90 advanced

COLLATERAL MANAGEMENT

Realtime Pricing

Realtime, on-chain HELOC performance monitoring and pricing updates

REVERSE DUTCH AUCTION

Hourly Liquidity

Borrows and lends atomically matched every hour, on the hour

RISK MITIGATION

Collateral Markdown

Upon HELOC borrower delinquency, loan atomically marked at zero

LIQUIDATION

93% LLTV

Upon LTV breach, HELOC collateral seized and liquidated on Figure Connect

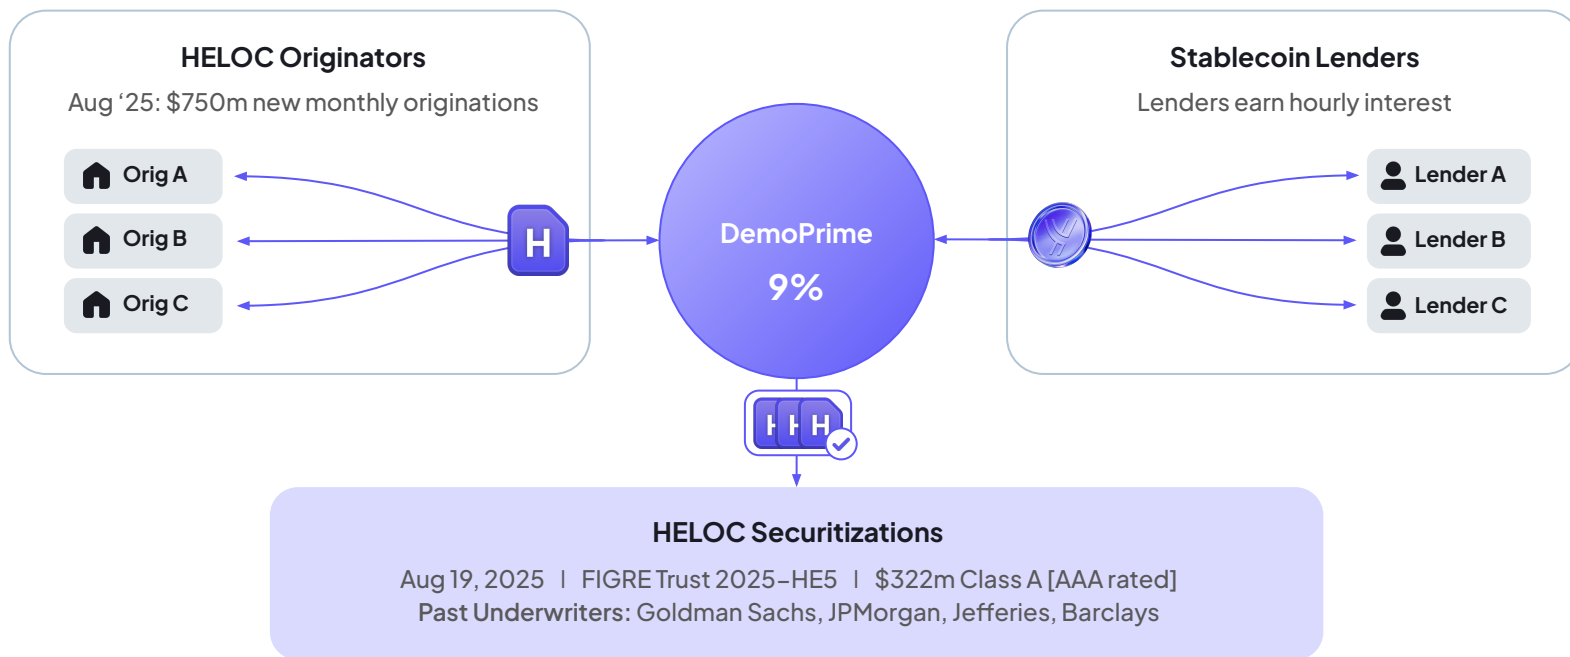

LENDER PROTECTIONS

Full Recourse

Borrowers are licensed mortgage originators, subject to full recourse

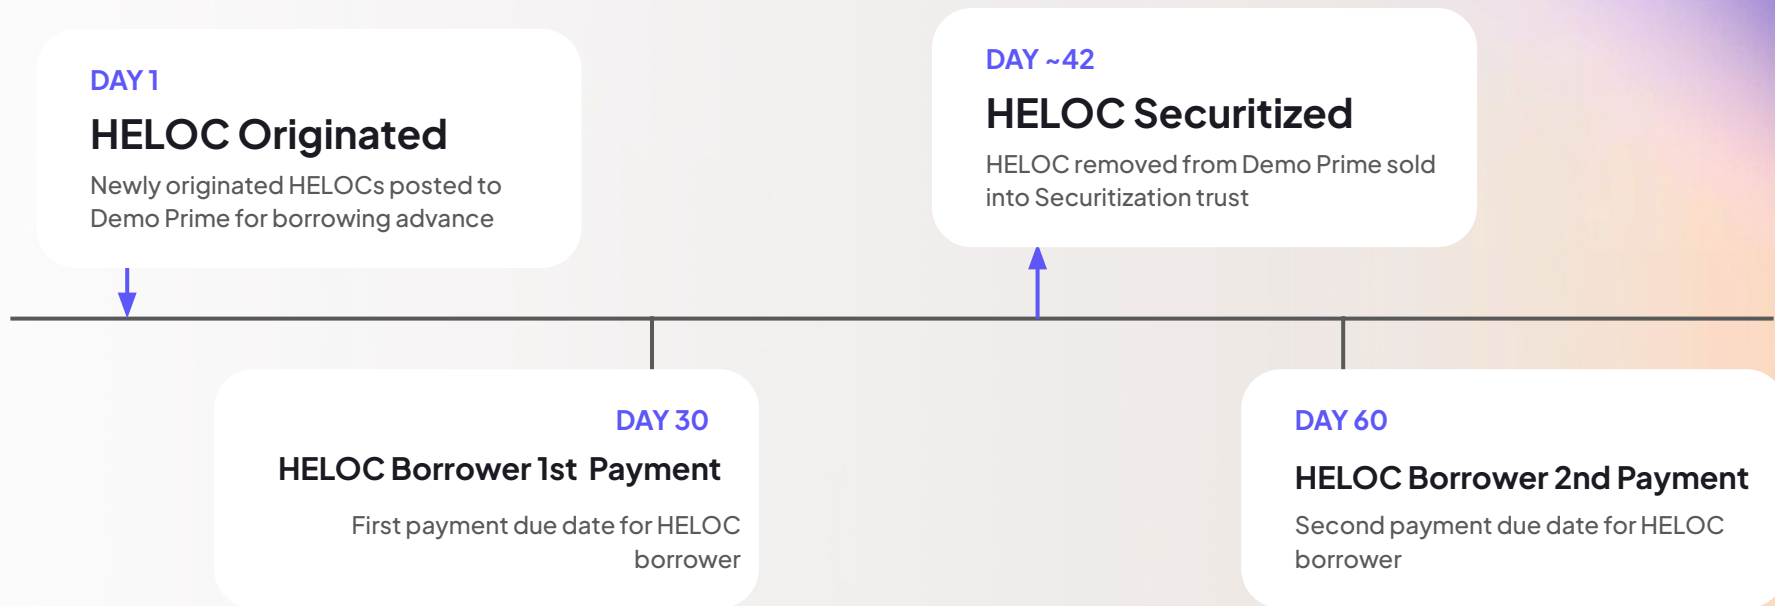

Demo Prime Today

Eligible HELOCs are collateralized in Demo Prime; borrowers draw stables, lenders earn hourly; inventory cycles out via AAA securitizations.

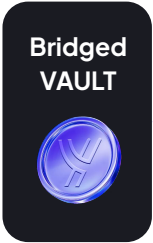

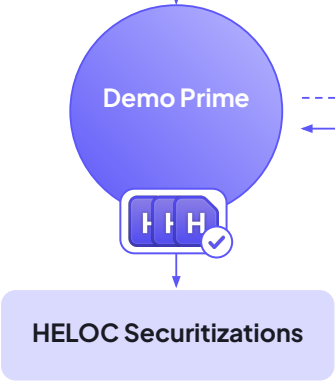

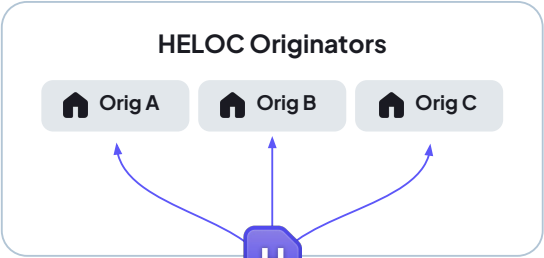

HELOC Collateral Life Cycle

HELOC collateral cycles through Demo Prime before borrower needs to make their second payment.

Connecting to Solana...

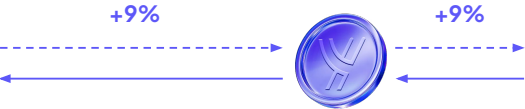

1

wYLDs

2

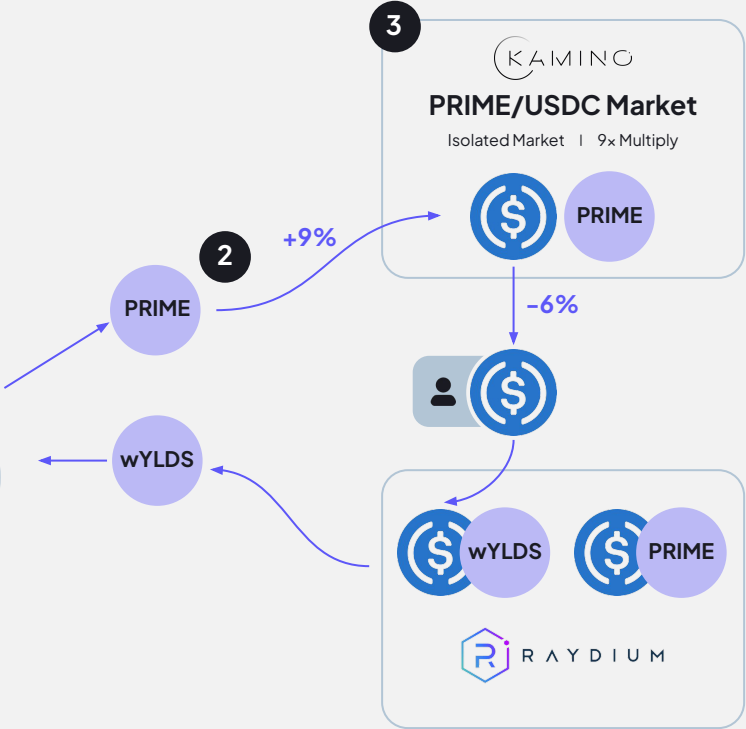

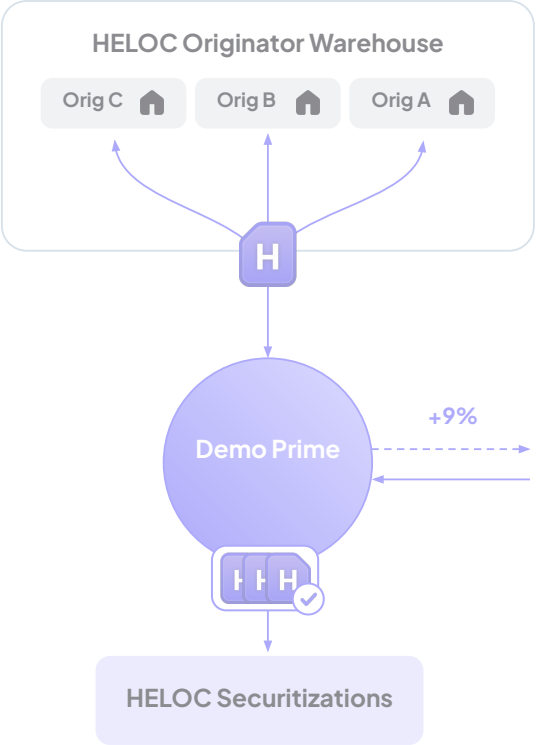

wYLDs

PRIME

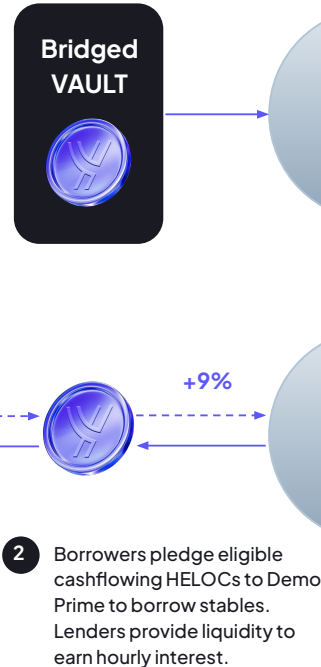

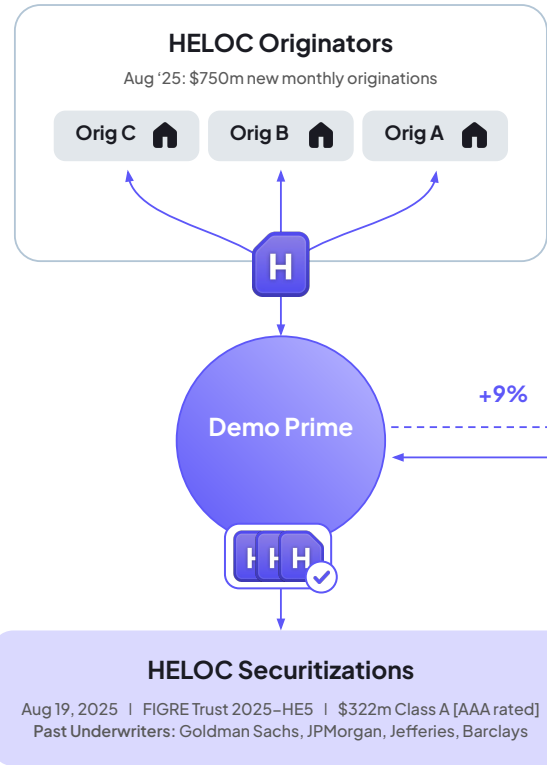

wYLDs = permissionless, interest-bearing stable, backed by YLDS
PRIME = permissionless, receipt token, earns staked yield in wYLDs from Demo Prime (*2hr unstaking cooldown)

Leveraging composability with native borrow/lend markets

Leveraging composability with native borrow/lend markets

1 Newly originated HELOCs posted to Demo Prime while awaiting ABS securitization to Wall Street asset managers, pension funds, insurance companies and banks.

Fully-permissionless Solana tokens connect sustainable, high-quality, low-volatility TradFi yields with full capital efficiency of leveraged looping across the largest liquidity and borrow/lend markets of DeFi.
